This book provides the reader with an opportunity to practice the double entry system of accounting. It contains 1000 practice questions. The solutions are provided for each question, along with an explanation, so that the student will be able to pinpoint exactly where any errors may have been made. These questions pertain to fictitious companies with revenues from services and sales. They include sales revenue, sales returns, various expenses, capital purchases, depreciation, dividend payouts, unearned revenue, and prepaid expenses. There are also practice questions for business loans, which include the posting of interest expense as well as the principal portion of the loan repayment. This book does not teach the theory, but instead, it is intended to allow students to practice what they have learned in their introductory accounting or introductory bookkeeping course.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
