Pathways to Personalization offers an innovative five-step framework to help school leaders and teacher teams design and implement blended and personalized learning initiatives based on local needs and interests. The book draws on principles of improvement science and change management, as well as work in nearly five hundred classrooms, to help educators define their own rationale for personalized learning; it guides them as they establish small pilot initiatives, determine criteria for success, evaluate their efforts, and create a path for replication and scale. Filled with activities and templates for organizing information and student feedback, the book also includes many examples of how district leaders, school principals, and teachers have successfully navigated the change process to create more student-centered classrooms. Shifting a school or district to offer more personalized learning requires a great deal of commitment, passion, and energy, but it also demands a strategic process. Pathways to Personalization meets this need by providing a field-tested road map for educators seeking ways to meet the academic and emotional needs of all students, and to empower them to take charge of their own learning.

Raise the academic bar for your students and watch their confidence and success skills increase. STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS! SECOND EDITION provides an accessible and relevant way for students to move beyond opinions and advice about how to succeed in college by offering an integrated approach of research-backed student success practices paired with student success research studies. Students learn how to put skills for success into practice as they strive to accomplish their academic goals. With an overall theme of reading, critical thinking, and information literacy skills, the text helps students feel comfortable with the structure of research study articles, making it more likely that they will successfully use these higher level sources earlier in their academic careers. By increasing academic rigor, STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS! SECOND EDITION builds research-based knowledge about what study skills work; teaches students how to engage with scholarly sources; provides opportunities for students to actively read, critically think, and enhance information literacy skills; and supports students to increase their self-efficacy and motivation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

If time could be measured in moments how many moments would we say really made a change in our lives. What happens when we wait to long to tell someone that we see them, admire them, and think their the missing piece in your life's puzzle. It took over a decade of desire before the first letter was ever written expressing the love he shared for her. What happens when an affair goes beyond the realm of physical attraction, and the emotional aspect takes over? Journey into the world of love, desire, and internal conflict as page after page reveals the passion and love that's possible when two people believe! Over a decade of desire, attraction, and fantasy turned into a love that could rival the greatest love story ever told. Some things may make you laugh, something might make you cry, other things may make you say "wow" but its all true every last word of it.

Traces the panoramic story of the sweet substance and its important role in shaping world history.

The purpose of the Special Issue 'Quantitative Methods in Economics and Finance' of the journal Risks was to provide a collection of papers that reflect the latest research and problems of pricing complex derivatives, simulation pricing, analysis of financial markets, and volatility of exchange rates in the international context. This book can be used as a reference for academicians and researchers who would like to discuss and introduce new developments in the field of quantitative methods in economics and finance and explore applications of quantitative methods in other business areas.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The margraival court astronomer Simon Marius, was involved in all of the new observations made with the recently invented telescope in the early part of the seventeenth century. He also discovered the Moons of Jupiter in January 1610, but lost the priority dispute with Galileo Galilei, because he missed to publish his findings in a timely manner. The history of astronomy neglected Marius for a long time, finding only the apologists for the Copernican system worthy of attention. In contrast the papers presented on the occasion of the Simon Marius Anniversary Conference 2014, and collected in this volume, demonstrate that it is just this struggle to find the correct astronomical system that makes him particularly interesting. His research into comets, sunspots, the Moons of Jupiter and the phases of Venus led him to abandon the Ptolemaic system and adopt the Tychonic one. He could not take the final step to heliocentricity but his rejection was based on empirical arguments of his time. This volume presents a translation of the main work of Marius and shows the current state of historical research on Marius.
