Fantasy clashes with reality as a woman's passions are torn between two impossible options. From USA Today bestselling romance author Sara Orwig, "Sara Orwig really shows her stuff in the marvelous OREGON BROWN...This book is destined to become a real classic."—Romantic Times "[A] deftly humorous touch...with a unique first encounter." —Chicago Sun-Times Charity Jane Webster spends her evenings listening to the sexy voice of DJ Rory Runyon flowing across the airwaves. Filling her nights with love songs and whispered endearments, he's the perfect fantasy lover—unlike her distractingly handsome neighbor. Oregon Brown drives Charity crazy, somehow knowing all of her deepest secrets while being impossibly seductive. Charity will have to choose between the voice that haunts her dreams, and the man who can hold her in his arms. "This...proves that the great romances can stand the test of time. Sara Orwig is at her best with the poignant, witty, and charming OREGON BROWN." —Affaire de Coeur magazine

Since the first edition of this book, geometrical methods in the theory of ordinary differential equations have become very popular and some progress has been made partly with the help of computers. Much of this progress is represented in this revised, expanded edition, including such topics as the Feigenbaum universality of period doubling, the Zoladec solution, the Ilijashenko proof, the Ecalfe and Voronin theory, the Varchenko and Hovanski theorems, and the Neistadt theory. In the selection of material for this book, the author explains basic ideas and methods applicable to the study of differential equations. Special efforts were made to keep the basic ideas free from excessive technicalities. Thus the most fundamental questions are considered in great detail, while of the more special and difficult parts of the theory have the character of a survey. Consequently, the reader needs only a general mathematical knowledge to easily follow this text. It is directed to mathematicians, as well as all users of the theory of differential equations.
