Driving is the most dangerous thing each of us does on a daily basis - and yet the average learner receives just eighteen hours' training - less than a Starbucks barista. In this inspirational, fully illustrated, highly entertaining book, former Top Gear star Ben Collins uses his super-charged experience of racing, stunt-work and cutting-edge scientific knowledge to tell you all of the things you didn't learn on your test - and in the process will make your driving safer, more economical and a lot more enjoyable. The skills described in How to Drive, from skid control to gear changes that are as smooth as a cashmere codpiece, have been honed on racing tracks by the greatest drivers in the world. This is the stuff your instructor missed, your dad forgot and your mates pretend to know . . . but don't. Packed with illustrations, gobsmacking driving anecdotes, humour and wisdom, this is the ultimate book for anyone who wants to be better at something they do every day of their life. The world population of motor vehicles exceeded a billion a couple of years ago. Let's make sure their owners understand how to use them.

According to tradition, each Master or Mistress who

was responsible for a particular Satanic Temple or group, was given on his or her assumption of that responsibility, a copy of the Black Book of Satan. The Black Book contained the basic Satanic rituals and instructions relating to ceremonial magick in general. The whole text of the traditional Black Book is included in the present work, together with several additional chapters (e.g. Self-Initiation; Organizing and Running a Temple). These additions make this present work a concise practical handbook for those seriously interested in the Black Arts.

Time and Memory brings together for the first time psychological and philosophical approaches to these fundamental and mysterious aspects of human cognition and consciousness. Fifteen specially written essays offer insights into current theories of memory processes and debates about how time is represented in memory, and draw out key issues concerning the phenomenology and epistemology of memory and its role in our understanding of time.
