Embedded Microcomputer Systems: Real Time Interfacing provides an in-depth discussion of the design of real-time embedded systems using 9S12 microcontrollers. This book covers the hardware aspects of interfacing, advanced software topics (including interrupts), and a systems approach to typical embedded applications. This text stands out from other microcomputer systems books because of its balanced, in-depth treatment of both hardware and software issues important in real time embedded systems design. It features a wealth of detailed case studies that demonstrate basic concepts in the context of actual working examples of systems. It also features a unique simulation software package on the bound-in CD-ROM (called Test Execute and Simulate, or TExaS, for short) that provides a self-contained software environment for designing, writing, implementing, and testing both the hardware and software components of embedded systems. From practical to playful, inspired recipes that reveal the hidden potential of plants At the award-winning restaurant, The Acorn, plants are celebrated: explored, enhanced, coaxed with creativity, and dressed for a night of being the center of attention and the phenomenal focus of every plate. In their first cookbook, Shira Blustein and Brian Luptak—The Acorn ' s owner and chef—share their truly unique recipes, highlighting the endless possibilities that come when cooking with the seasonal and wild-crafted ingredients gifted to us by nature. Defying categorization, with dishes that are anything but predictable, this cookbook will leave even the staunchest of meat eaters satisfied. The recipe chapters are structured by season, with an Essentials chapter at the start of the book—full of pickles, vinegars, oils, and plant-based alternatives—and a Cocktails chapter at the back. All the recipes are broken into components, and range from the simple but sublime Spring Radishes with Ashed Spring Onion Almond Sauce, Fried Garlic Scapes or Stinging Nettle Soup, to the intriguing Fried Zucchini Blossoms with Fermented Zucchini Pur é e and Apricot Chili Sauce, Smoked Caramelized Parsnip and Potato P â t é , or Squash and Chanterelle Gnocchi. And the recipes focus on minimizing waste and maximizing the potential of each plant—as the stems of one recipe become the pickled star of another. Encouraging us all to be adventurous with our vegetables, Acorn offers a year ' s worth of seasonal recipes, infused with brilliant creativity. Visually compelling, and masterfully thought through, Acorn takes vegetarian cooking to the next level, and is a cookbook to read, admire, and inspire.

Kenny Glynn is the world ' s biggest Saints fan and for twenty-five years he has been locked in a game of football against the world. On his 26th birthday the world steps up its game and Kenny Glynn faces the match of his life as he takes on women, money and status with the help of his mates, his family and the guiding spirit of Matt Le Tissier. Can they conquer all the things the world is throwing at them? Will Southampton ever win the FA cup again? And what can we learn from the icons we hold so dearly at the club? The Saints, written by Luke Barnes and directed by one of British theatre's best directors Matthew Dunster, explores football in Southampton, the history of the club and how it has shaped our understanding of ourselves in the city.

Meanwhile in Essex, Tom Adams is stood in Colchester Magistrates Court. He also has had enough of his life of petty crime and drugs. He wants something better. Sheer chance brings the boys together, a meeting that unfortunately ends in tragedy, and only gets worse as the week unfolds...

Drawing on a wealth of knowledge and experience and a background of more than 1,000 magazine articles on the subject, engine control expert Jeff Hartman explains everything from the basics of engine management to the building of complicated project cars. Hartman has substantially updated the material from his 1993 MBI book Fuel Injection (0-879387-43-2) to address the incredible developments in automotive fuel injection technology from the past decade, including the multitude of import cars that are the subject of so much hot rodding today. Hartman's text is extremely detailed and logically arranged to help readers better understand this complex topic.

Takes engine-tuning techniques to the next level. It is a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine.
