Offers information for buyers of electronic equipment, from cellular phones to televisions, including ratings charts and a brand-name directory

The second edition of this highly successful book, Dyslexia and Learning Style builds on the latest research to extend its practical, evidence-based approach to learning style in the educational environment. Containing a response to the most recent critical insights into style theory and new suggestions for practical work for students within a range of educational contexts, this book remains essential for any teacher wishing to use awareness of style preferences to ensure that all students are helped to succeed. Recent government policy emphasises inclusive teaching for all and personalised learning. This means that all teachers need to consider how they can adapt the ways in which they teach to maximise success for all learners. The first section of this practical book provides an overview of the latest research into both dyslexia and learning style and how pupils should be helped to consider the ways in which they can take responsibility to make use of their style preferences to learn effectively. The second section provides ways in which style preferences can be established. It offers techniques to help students absorb, process and create responses to information across the curriculum. It suggests practical ways in which teachers can adapt material to make it accessible to a range of learners and provides activities to help students develop a more flexible approach to learning throughout their studies in school and higher education.

A thoroughly updated and expanded step-wise guide to the study of animal behaviour.

The Hydrologic Engineering Center (HE) is developing next generation software for one-dimensional river hydraulics. The HEC-RAS River Analysis System is intended to be the successor to the current steady-flow HEC-2 Water Surface Profiles Program as well as provide unsteady flow, sediment transport, and hydraulic design capabilities in the future. A common data representation of a river network is used by all modeling methods, thus allowing the user to more easily migrate from steady-flow model with several significant advances over HEC-2. An overview of the Version 1 program package and some of the improved hydraulic features are presented.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Mickey Mouse, Donald Duck, and all their friends have lots of zany adventures.
