This chapter focuses on the use of computers as persuasive tools. It describes the seven types of persuasive technology tools, such as reduction, tunneling, tailoring, suggestion, self-monitoring, surveillance, and conditioning. Each type of tool applies a different strategy to change attitudes or behaviors.

Persuasive Technology | ScienceDirect

Persuasive technology is broadly defined as technology that is designed to change attitudes or behaviors of the users through persuasion and social influence, but not through coercion. Such technologies are regularly used in sales, diplomacy, politics, religion, military training, public health, and management, and may potentially be used in any area of human-human or human-computer interaction. Most self-identified persuasive technology research focuses on interactive, computational technologie
